Competition 2024: **Fighting the Climate Crisis**

At this year's AGM, Venturers brought forward a motion to encourage our members to recognise the on-going climate emergency and the necessity of Woodcraft Folk locally and nationally to contribute to solutions to the crisis through our own practices. From 2023 Woodcraft will make efforts to ensure all camps, residential activities and weekly group nights are sustainable.

In keeping with this year's motion we want our young members to explore how they can make changes in their group and camps/residentials to help fight the climate crisis and illustrate their favourite ideas.
